HEALTH & SAFETY POLICY

Tarpin Lumber is vitally concerned about the health & safety of its staff. Protection of its staff from injury or occupational disease is a major continuing objective. We will make every effort to provide a safe, healthy work environment. All coordinators, team leaders and team members must be dedicated to this objective of reducing risk of injury.

Tarpin lumber as an employer is ultimately responsible for staff health and safety. As president and head coach of our team, i give you my personal promise that every reasonable precaution will be taken for the protection of our staff.

We must all rely on our joint health & safety committee to ensure we are meeting this objective. All recommendations made by this committee will be acted on immediately.

Coordinators and team leaders will be held accountable for the health and safety of staff under their direction.

Coordinators and teams leaders are responsible to ensure that machinery and equipment are safe and that staff work in compliance with established safe work practices and procedures. Staff must receive adequate training in their specific work task to protect their health and safety.

Every team member must protect his or her own health and safety by working in compliance with the law and with safe work practices and procedures established by tarpin lumber. Failure to comply with this practice will result in dismissal.

It is in the best interest of everyone to consider health & safety first in every activity.

Commitment to health and safety must form a corner post in our organization regardless of your particular contribution.
